- Control panel
- How to provide feedback
 - Panelists

www.seattle.gov/CSO

Today's Agenda

- Overview of Seattle Public Utilities Combined Sewer Overflow Reduction Program
 - Long-Term Control Plan purpose, need, schedule
 - Environmental review process
- Seattle Public Utilities' strategies for reducing CSOs
 - Long Term Control Plan Alternatives
 - Next steps

Combined Sewer Overflows (CSO)

SPU CSO Outfalls

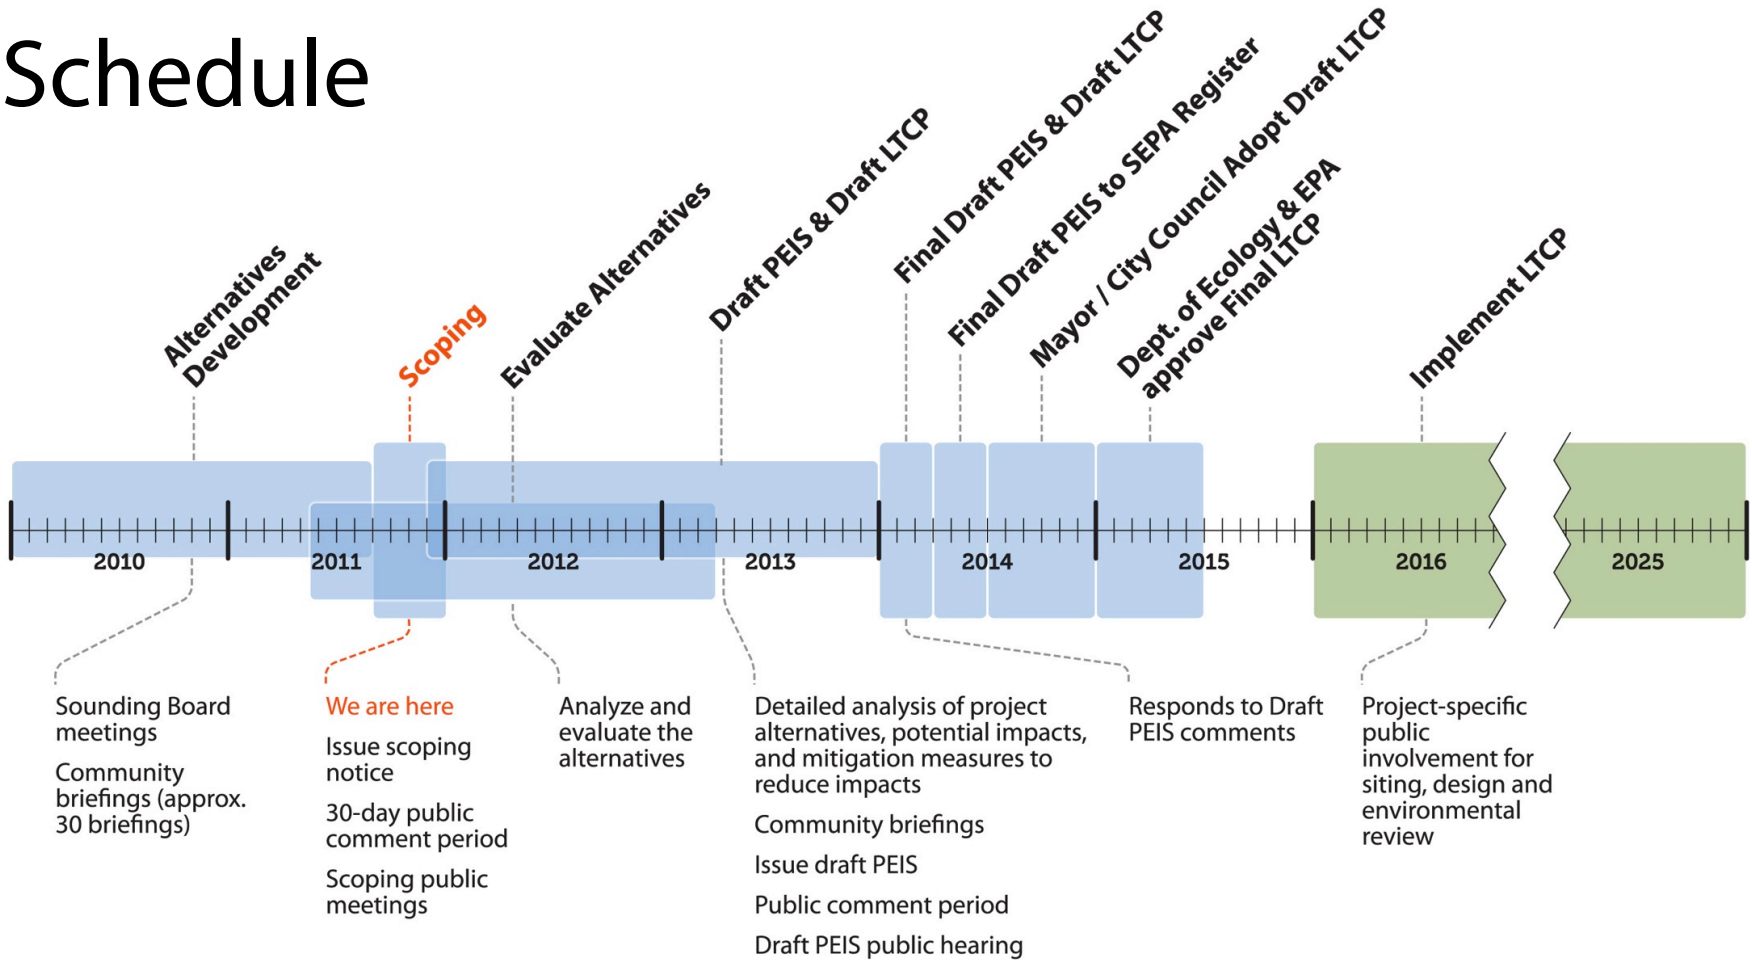

- Seattle Public Utilities manages 90 outfalls in Seattle

Long-Term Control Plan

- The plan will:
 - Identify areas where CSO reduction projects are needed
 - Evaluate CSO reduction alternatives
 - Select a preferred solution for each affected area
 - Recommend a project schedule
 - Estimate program costs and rate impacts
 - Consider public and stakeholder input

Schedule

Environmental Review Process (EIS)

- Programmatic EIS
- Issues to be examined in detail:
 - Transportation
 - Recreation
 - Land and shoreline use
 - Historic and cultural resources
 - Public safety and environmental health
 - Other issues identified during scoping

CSO Reduction Strategies

3 Steps to Reducing CSOs:

1. Fix it first
2. Keep stormwater out
3. Store what's left

Fix it First

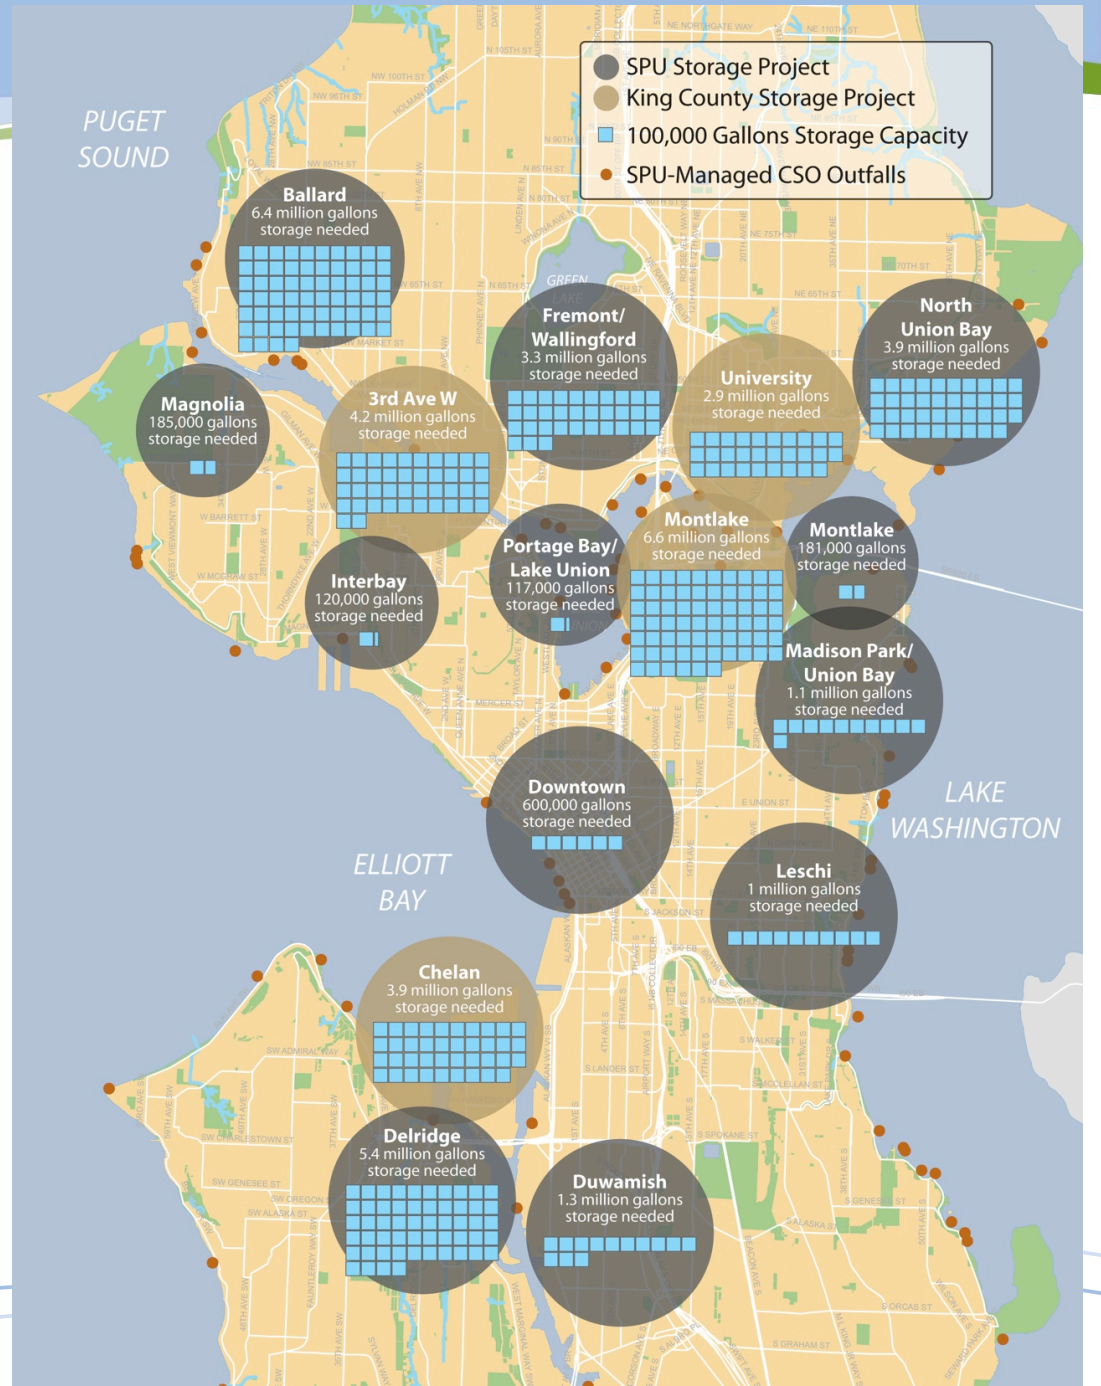

Keep Stormwater Out

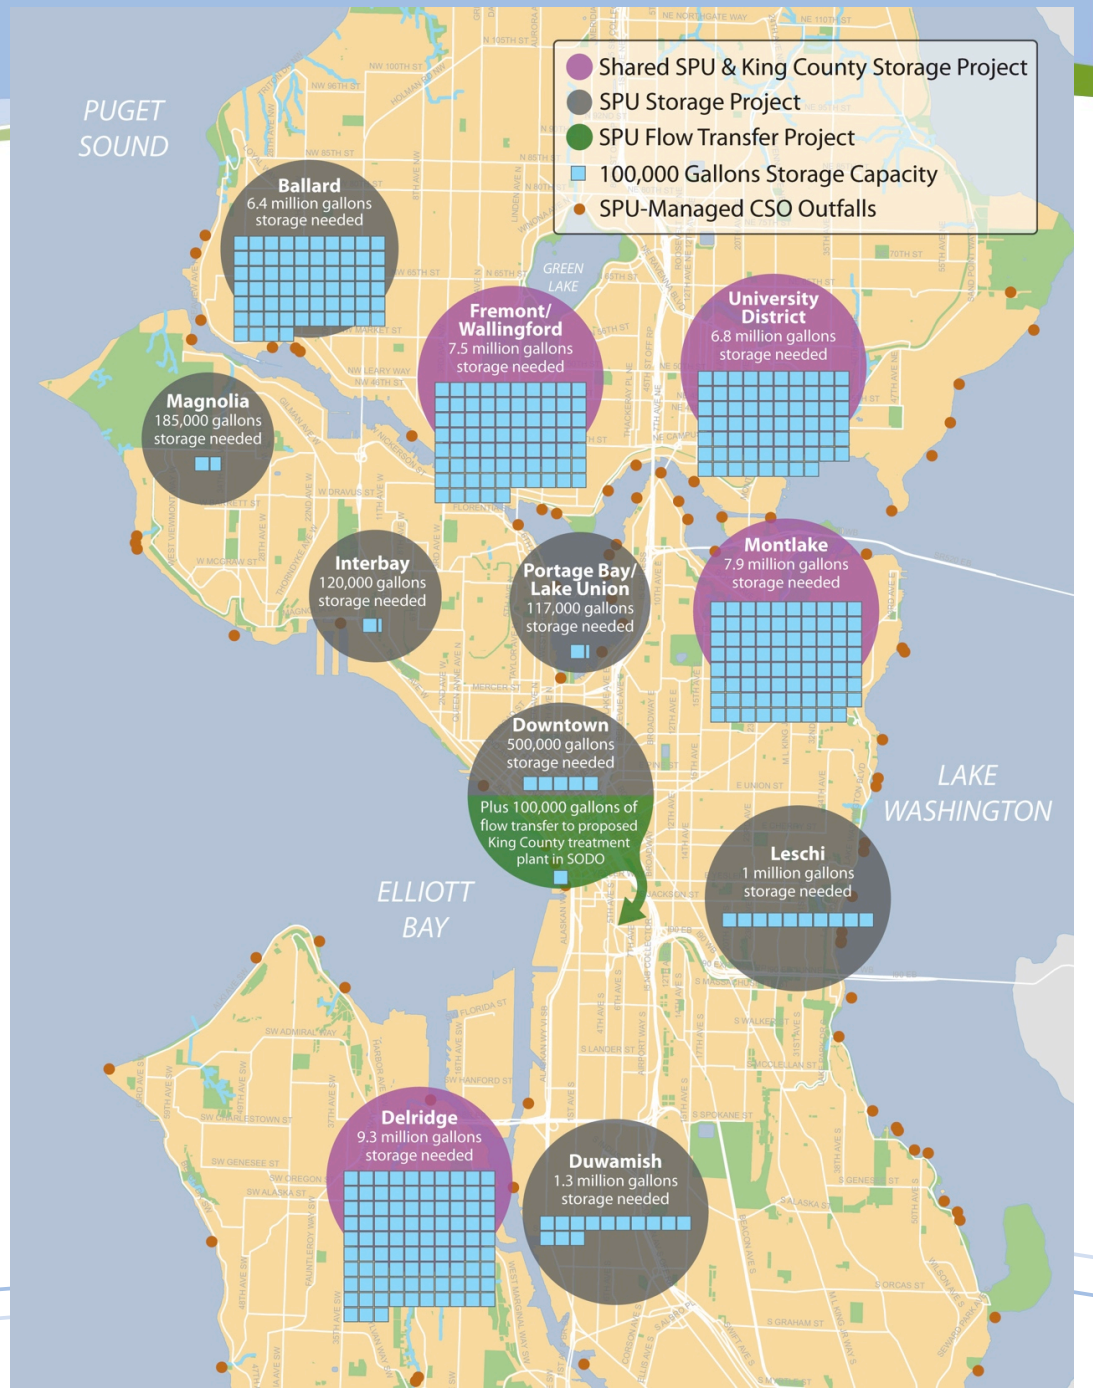

Store What's Left

Alternative 1: Neighborhood Solution

Alternative 2: Shared Storage Solution

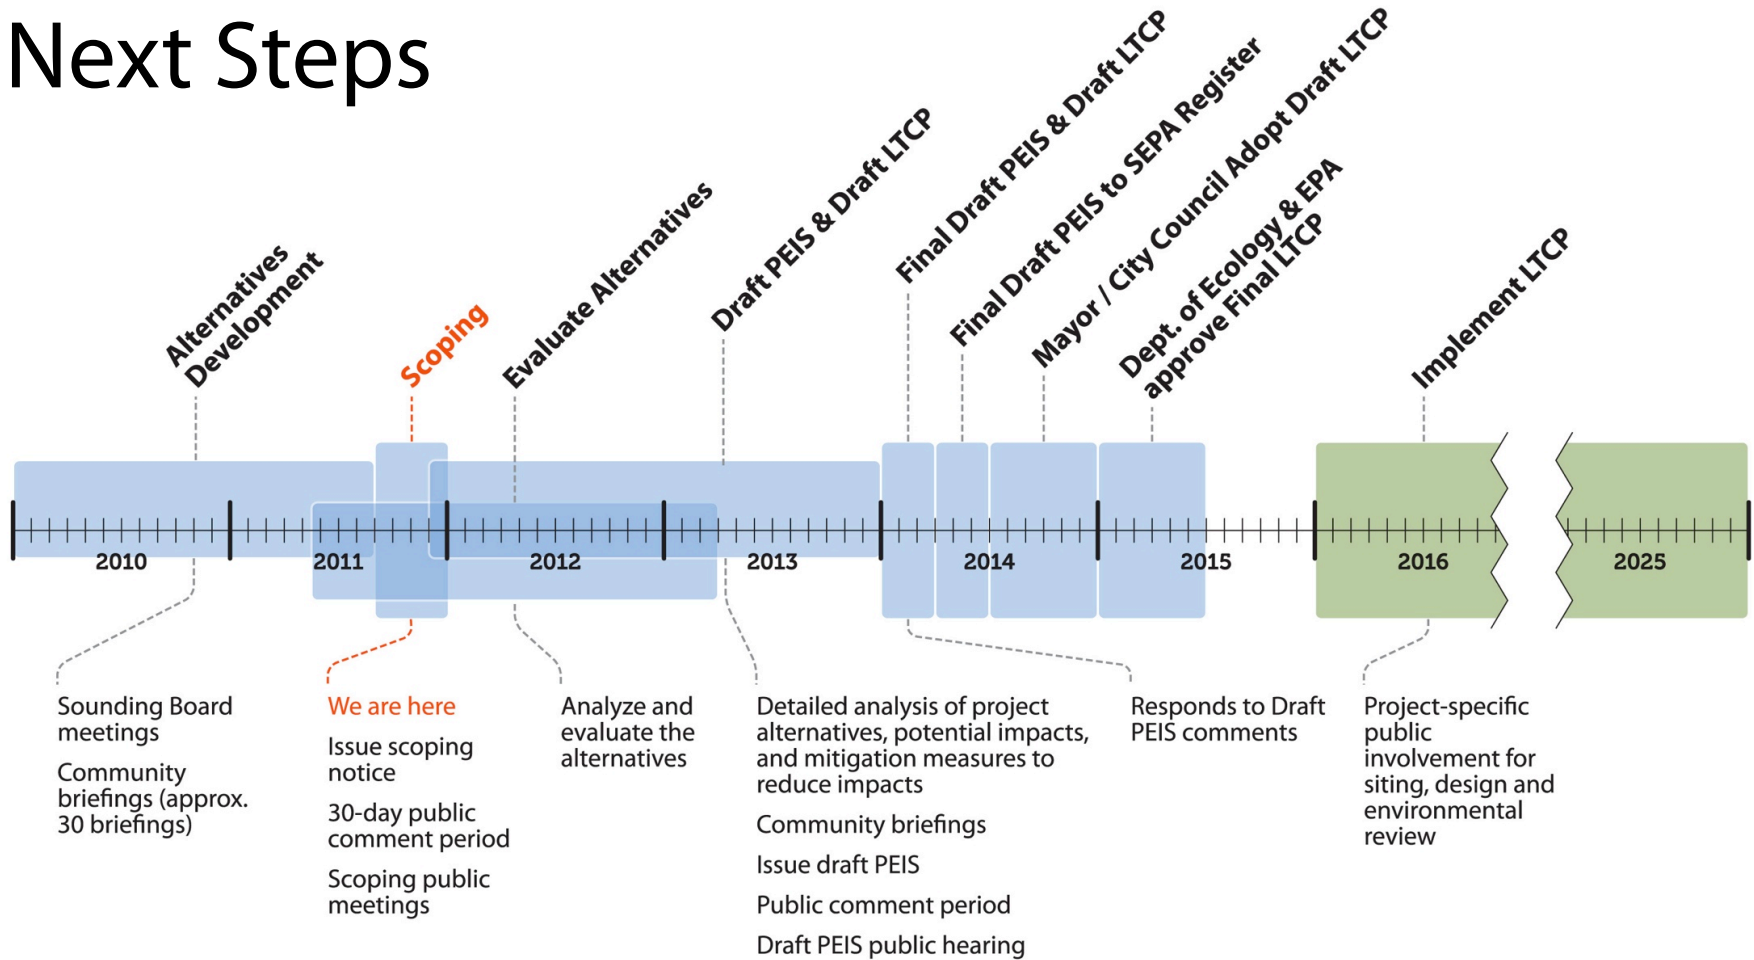

Alternative 3: Shared Tunnel Solution
